

CATALOGUE 2026

WE GIVE COMMERCIAL WASTE MATERIALS **NEW LIFE**

Our designers and machinists transform waste materials into high-quality consumer goods.

OpenSource Circular is an innovative manufacturing outfit specialising in making high-quality, white-labelled consumer goods and merchandise from commercial waste materials. We turn scrapped canvas, billboards, upholstery, bedouin tents, yacht sails, and textiles into original, durable merchandise and accessories for your brand, school, event or business.

As we are aiming for longevity, we will use only the best zips, webbings and trimmings that we can find.

All products are fully customizable according to your specifications.
